Certification

1. COUNTRY, GENERAL AND ANIMAL HEALTH STATEMENTS

I, the undersigned official veterinarian of..... (country) hereby certify that:

1.1. The dog/cat for export identified in box I.19 has been continuously resident in the country of origin since birth or at least six (6) months immediately prior to certification.

1.2. The dog/cat to be exported was **not** subjected to experimental use.

1.3. The dog/cat is identifiable with an International Standards Organization (ISO) compliant microchip. *(The transponder number, implantation site and date, microchip manufacturer data & the individual animal identification must be stated in the table below.)*

1.3.1. The microchip number is recorded on all vaccination and treatment records, laboratory results, and certification.

2. TEST, TREATMENT AND VACCINATION STATEMENTS

2.1. While in preparation for export, the dog/cat was tested, treated and/or vaccinated against the below listed organisms or diseases:

2.2. The tests were conducted either at a government veterinary laboratory or another laboratory approved by the competent authority of the exporting country. Please indicate the date and methodology of testing, where not specified. All test results must be negative and/or treatment administered where applicable.

2.2.1. **Helminths:** Faecal examinations conducted and the dog/cat was treated **twice** by an approved veterinarian, at least fourteen (14) days apart with the final treatment seven (7) days prior to export. Treatment should be with broad spectrum anthelmintic(s) that is/are registered for use in the country of origin and effective against the nematodes, cestodes and trematodes. *(State the active ingredients, product name, dose rate and dates of treatment).*

2.2.2. **External parasites:** examination and treatment by an approved veterinarian TWICE using products registered in the exporting country for the control of **flies, ticks, lice and mites** at the manufacturer’s recommended dose. Dog/cat to be certified as free
